

PROJECT

DESIGN AND BUILD OF ELLEN WILKINSON CHILDREN'S CENTRE

CLIENT

LONDON BOROUGH OF NEWHAM

VALUE

£1.6M

CONSULTANT

LONDON BOROUGH OF NEWHAM

Lakehouse was chosen to undertake the design and build of Ellen Wilkinson Children's Centre, in a heavily built up East London residential area.

The innovative single-storey development was constructed using curved laminated timber beams and curved profile roof and cladding in terracotta tiles from Germany. The new building contrasts beautifully with the themed external landscaping, which includes sensory gardens and wet and dry play areas.

Lakehouse's Construction Director and the site team developed a close affinity with the school and were delighted to take part in assemblies, interacting with the children, talking about the changes to their school and emphasising the importance of health and safety on all building sites.
