

PROJECT REFURBISHMENT OF BASEMENT AND CREATION OF HALL FOR WOODSIDE PARK INTERNATIONAL SCHOOL
CLIENT JOHN CATT EDUCATIONAL LIMITED
VALUE £500K
CONSULTANT JOHN TROWER LIMITED

Woodside Park International School, in Frien Barnet, educates local and international community boys and girls and actively embraces and celebrates children’s differences.

Lakehouse was excited to work in a school with such a unique personality and undertook extension and alterations to the existing school hall to provide new classrooms, common room, hall and lift facilities.

Previously unused and uninhabitable basement spaces were tanked and fitted out for school use.

The new school hall and adjacent music room were created by providing a new structural floor in an existing space, made possible by the curved portal framed roof structure. Teachers and students alike have made good use of the excellent new facilities.
