TRANSFORMATION OF BASEMENT TO STORY DEN  
DISCOVER CHILDREN'S CENTRE  
£350K  
DISCOVER CHILDREN'S CENTRE

Discover is a registered charity, based in Stratford, which provides creative play and learning opportunities to enable children aged 0 to 11 and their carers to develop their potential.

Lakehouse was glad to transform the disused and uninhabitable basement into a fantastic space where children can let their imagination fly. The basement was tanked to prevent damp and make it watertight, a state-of-the-art air conditioning system was installed and various mechanical and electrical works were undertaken.

Most exciting of all was the installation of a retractable wall which enables staff to create a secluded, private area for music activities, fully insulated so that it does not disrupt other creative projects.

Lakehouse was delighted to work with the staff of Discover, voted by Time Out as one of London's top five kids' days out in 2007, and to improve facilities for families in circumstances of social and economic disadvantage.
